Gift ForbesMagazine DetailsIn this issue Of Reed Hastings Rewrites Hollywood Screenplay Netflix has already upended Hollywood when the pandemic hit. But taking advantage of a very unusual style of management, its billionaire founder is positioning his behemoth to prosper like several companies in the world at the moment. By Dawn Chmielewski Forbes 400 Pandemic be condemned: the 400 richest people in America are richer than ever, up collective 8%. Last year's entry threshold (\$2.1 billion) persists, and even in these difficult times, new mega-fortunes are still being hammered out. Cancel anytime [No Commitments]Digital OnlyRECENT ISSUESView AIRELATED MAGAZINESView All The 600 entrepreneurs, activists, athletes, scientists and entertainers who made our 10th annual list of the brightest young innovators provide millions of reasons to believe in a better tomorrow. Be Billions. For the 10th time. What has emerged is a literal movement, a community determined to positively change the world, in the long term, with entrepreneurial thinking at the center. Interviews with more than 75 people expose deep problems threatening the College Board's billion-dollar monopoly testing. The great-grandfather of standard tests may not survive. How has it put together a strong application when it is almost impossible to take an admission exam, the school switched to pass/failed classes during the crucial spring period in the younger year and extracurricular and summer work all but canceled due to a pandemic? Bob Bob you could easily call your career in 2015, after he sold Pharma-cyclisys, his biotech cancer drug, to AbbVie.Ryan Hogan and Derrick Smith cash in on a pandemic deadly combination of boredom and screen fatigue by selling addictive murder secrets packed in monthly subscription boxes. The latest superstar investor has leveraged zealous faith in innovation in the company's \$29 billion assets and \$250 million net worth. Jared Isaacman made a small fortune training fighter pilots, but his wealth grew this summer when he took his public business processing payments amid a pandemic. Amid the fashion apocalypse, one of America's great entrepreneurial retailers (and one of America's richest self-made women) takes us deep into her struggle to save her brand. In late February, Target CEO Brian Cornell was sipping coffee at the Manhattan Deli-one eye on a speech he soon gave at an investor conference and another on his phone as news alerts about America first confirmed. During the pandemic, no part of the economy became more difficult than restaurants. A high-accident, customarily thin industry margin at the best of times, restaurants have been devastated by nationwide blockades. For many things even worse were the irrationally slow steps to reopen taken in some parts of the country. Incredibly, the worst offender was New York. This is shocking because the Big Apple has long been the center of outstanding, stunningly creative restaurants. Pre-Covid, the industry employed more than 300,000 people in New York. The prospect of fine dining was a key attraction for tourists, whose visits were a key part of the city's economy. However, the nasty and incribable incompetent Mayor of New York, Bill de Blasio, enthused with sadistic delight in unjustifiably delaying any significant reopening of traditional restaurants. Did... Dr. Seuss \$33 million DIED: September 24, 1991 (87) CAUSE: Cancer Thanks to a series of seven television and film characters offerings, Seussville is a much richer neighborhood. But the books remain one of the best income streams of a good doctor: It has sold nearly 6 million in the United States this year. Sam-I-Am now has a lot more greens to go with these eggs and ham. The estate of Theodor Seuss Geisel (better known as Dr. Seuss) nearly doubled its income in 2020, earning about \$33 million in a very grinch-like year. The bigger payout is thanks to a smart new strategy from Dr. Seuss Enterprises' team, which transformed 60-plus books from the beloved children's author into a multimedia universe: Think Marvel's Avengers without crossover characters. First in the Seuss-iverse was Netflix's Green Eggs and ... Big Hit Entertainment, the creative agency behind BTS, the global sensation of the K-pop boy band, went public in October, making its founder, Bang Shi-hyuk south Korea's newest billionaire. With his 35% stake in the company, Bang, 47, has an estimated net worth of \$1.8 billion. Seven BTS members, all of whom are in 20th, also received an unexpected IPO: Everyone now has a stake in Big Hit worth more than \$10 million. Nicknamed Hitman, Bang co-founded JYP, one of South Korea's top creative agencies, before he started Big Hit in 2005. He enjoyed modest success with two previous K-pop groups, 8Eight and 2AM. He later founded BTS, signing seven largely unknown young men who had never performed together before. The band's first single, No More... Forbes has long supported business women. The first issue of Forbes, published in 1917, had what he called a unique section mentioned on the cover: Women in Business. Publishing this section and presenting it on the cover was progressive for all media at the time. Fast forward 103 years on the updated take on women in business, Forbes Asia's annual list of Power Businesswomen featured in this issue. All entries on this year's list are new for 2020. The industries in which these women excel have a wide range — including edtech, fast fashion, insurance, alcohol, private equity, specialty chemicals and tea. Good entrepreneurs, in other words, can find a chance almost anywhere. Some are self-made and run their own businesses, while others are forward organizations, including corporations, law firms, universities or family businesses. Almost everyone had to deal with the impact of a pandemic in some way, especially in pharmaceuticals or healthcare. We hope that this list can serve as an inspiration not only for women, but also for men, because it shows the power of entrepreneurial spirit, regardless of gender. The second list in this issue is that of the Philippines' 50 Richest. Here's another place where you can find examples of entrepreneurial spirit. A feature on Lance Gokongwei describes how he takes over the leadership from his late father, John Gokongwei Jr., who died last November. The father, who started selling garlic-flavored peanuts at the age of 13, built the JG Summit in one of the largest companies in the country. Lance, meanwhile, is working hard to turn around the airline's company, Cebu Air. Another example is Tony Tan Caktiong. His fast-food chain Jollibee became a big hit, but he reacted by exploring the use of a cloud kitchen. Others are willing to take risks by betting on the long-term growth of the Philippine economy through their public companies in the midst of a pandemic. Ayala's family made history by listing the country's first reit in August, and the second reit auction by tycoon Edgar Sia II could happen by the end of the year. In this way, traders were able to rotate and adapt to the new standard. Working with the home trend provided a boost to the Japanese entrepreneur, whose company makes the software allow employers to monitor the productivity of employees at home. To revise the old adage that the crisis creates an opportunity, in a pandemic, also a possibility. As always, all comments welcome on the editor@forbesasia.com. editor@forbesasia.com.
